From the Montclair Land-bayer.

In view of the existing dissatisfaction felt by property-owners in Montclair regarding the recent assessment valuation for taxes for 1899, it may not be inapproperate to suggest in these columns what may not have occurred to all tax payers regarding the causes which lead to the seemingly unnecessary increase in valuations, and to one of the methods by which our taxes might be yearly reduced rather than increased. It is a well-known fact that there are to-may in our town many tracts of unimproved property of.

Many of these tracts as to decide and prepared a leavening agent that is provided to the market at reasonable figures. Many of these tracts as the development of the same crude unimproved condition as twenty years ago. Neighborhoods have grown, up around them, but they have remained untouched by improvement and unoccupied, except perhaps, as pasture lauds. Upon turning for reference to the tax book of our town one will find, not infriequently, that these properties have for years been assessed at figures based upon values much below the market. Properties held by owners at \$40 to 800 par foot front, and upon which offers approximating these figures have been rejected, we find assessed it it it its more than farm valuations, i.e., lands held upon the foot front basic of \$5,000 per acre, assessed at about 25 per least of the properties of that amount.
